Data Processing Digest

3848 FREDONIA DRIVE, • LOS ANGELES, CALIFORNIA • 90068

PUBLISHED EACH MONTH SINCE 1955

VOLUME 29, 1983

1983 ANNUAL SUPPLEMENT

INDEX AND REFERENCE LIST

Title Index 1
Author Index 5
Subject Index 8
Periodical List 11

INDEX

This is the annual index for DATA PROCESSING DIGEST for the year 1983, Vol. 29, Nos. 1-12. The index is divided into three sections: the list of titles as they appeared in the Digest, a list of authors, and a subject index. All articles have at least one subject citation. Italicized titles are books, periodicals or reports. The numbers following the entries indicate issue and pages in which the item is found. The number preceding the hyphen is the issue; the numbers following the hyphen are the pages.

TITLE

Academic Computing: The State Of the Art In Equipment, Organization, and the Trend To Terminal Use and Networking, 9-22
Acceptance Testing Of Turnkey Software Packages, 1-10
Achieving the Promise Of the DBMS, 12-31
Ada: An Advanced Introduction, 11-34
Ada Tackles Software Bottleneck, 5-26
An Advanced-Architecture CMOS/SOS Microprocessor, 1-21
Advanced System Development/Feasibility Techniques, 4-25
The Adventure Of Getting To Know a Computer, 3-17
All Sorts Of BASIC Sorts, 2-23
Alphanumeric Terminal Market Overview, 2-9
Alphanumeric Terminals, 2-9
Alternate Approaches To Office Systems, 5-11
Americanizing Videotex, 4-16
Animation At Work, 2-19
Annual Source Guide and Reference Issue, 4-27
Another Mainframer Sets Sights On Office Automation, 3-25
Application Of the Personal Computer At the May Company, 6-29
Applying an Integrated Test Facility—An Example, 5-18
Approaches To Improve DP Productivity, 9-3
Architects, Engineers, Computer Product and the Law: a Matter Of Anticipation, 6-3
An Architectural Comparison Of 32-Bit Microprocessors, 7-18
Are Multifunctional Terminals Disguised Desk-Top Computers?, 4-17
Are You Ready For a Disaster?, 12-14
The Articulate Network, 10-22
Artificial Intelligence, 8-16
Artificial Intelligence, 2-26
Artificial Intelligence Goes Commercial, 5-28
Assault On the 3270: Now There Are Choices, 12-18
ATM System Concerns For Senior Bank Managers, 4-15
The Audit Information Center As a Productivity Aid, 12-16
Auditing Data Communication Networks, 1-9
Auditing In a Computer Environment, 3-10
Auditing a Manufacturing Control System, 10-20
Auditing the Operating System, 7-30
The Automated Law Office Consultant, 1-16
Automatic Fiche Frame Retrieval: Wave Of the Future Arriving Today?, 1-15
Automating the Systems Development Process, 6-12
Automation, Ergonomics, and Offices: Evolution or Revolution?, 3-12
Automation: The Key To Meeting OSHA Requirements, 7-28

Bargain Basement MRP, 7-26
BASIC/Apple II; A Programming Guide, 9-28
BASIC By Design: Structured Computer Programming In BASIC, 9-28
BASIC For Microcomputers: Apple, TRS-80, PET, 9-28
BASIC: An Introduction To Computer Programming With the Apple, 9-28
BASIC-Plus For Business, 9-28
The Best Available Technologies For Computer Security, 12-15
Better Management Means Lower Costs, 2-18
Beyond Local Networks, 10-14
Beyond Word Processing, 4-12
Bibliography of 1982 Performance Literature, 6-9
Bits Of Speech, 11-14
The Bottom Line On Microcomputer Maintenance, 5-2
Breaking the Dead-End Job Syndrome: The Case For Specialized Training For Computer Operators, 1-18
BRS Introduces Its New Medical Database System, 8-19
The Bubble Bounces Back, 5-30
Bug-Free Programming. . .You Just Have To Use It!, 2-2
To Build a Better Mouse, 6-18
Building a Ring Around the Office, 3-14
A Business Case For Subsecond Response Time: Faster Is Better, 7-4
Business Goes Back To School, 2-24
Business Micros—Newcomers Could Carve Out Market Niche With DSS, 3-19
A Business Systems Plan, 6-13
A Business User's Guide To Electronic Mail, 1-26
Buttonwood Apples, 2-23
Buying a Desk-Top Computer? You're On the Road To a Dilemma, 3-19
Buying Maintenance From Independent Organizations, 3-6

The C Language and Models for Systems Programming, 10-27
CAD/CAM: Computer Power Reshapes the World Of Manufacturing, 11-9
Can a Personal Computer Really Help You?, 6-29
Can Software Be Tied To Hardware?, 7-36
Can You Take a Catastrophe?, 5-15
Can You Trust Software?, 7-13
Capacity Management, 7-3
Capacity Management Issues, 9-2
The CAR Explosion: Megatrend Or Smokescreen?, 12-12

CAR: The Vehicle For Records Delivery, 11-29
Case-Mix Data System Prepares Hospitals For DRG-based Reimbursement, 4-14
Cataloging the Program Library, 7-7
Catching Microfiche With Computer Speed, 2-10
Challenges In Software Development, 7-9
The Changing Fabric Of Data Base Technology, 5-3
The Changing Role Of the Information Systems Executive: A Critical Success Factors Perspective, 3-15
Changing Role of Programmers, 8-24
A Checklist For Acquiring Application Packages, 12-34
Chessie: All Aboard For the Future Office, 10-3
CICS/VS Command Level With ANS COBOL Examples, 4-26
Commentary: Personal Computers and Videotex, 9-12
Common Carriers: Focus On Savings, 6-27
The Communications Regulatory Environment In the 1980s, 11-26
Communications Satellite Software: A Tutorial, 9-23
A Comparative Study Of Robot Languages, 4-21
Complex Contract Issues In the Acquisition Of Hardware and Software, 11-17
Computer-Aided Design, 11-10
Computer-Aided Engineering In Communications Satellite Design, 9-25
Computer Development Aids Blind Lawyers, 7-16
Computer Devices' DOT Portable Computer, 5-24
The Computer Establishment, 12-35
Computer Federalism, 2-18
Computer Forms: Five Chances For More Value, 9-6
Computer Fundamentals For Nonspecialists, 1-29
Computer Graphics In the Board Room, 8-23
Computer Graphics: The Perfect Visual Message, 5-22
The Computer In Typography: Challenges and Opportunities, 7-29
Computer-Induced Improvements In the Administration Of Justice, 11-30
Computer-Managed Instruction: An Explanation and Overview, 1-19
Computer Performance Evaluation Tools and Techniques For Effective Analysis, 1-30
Computer Security—Keeping Data Assets Secure, 5-17
Computer Security—Whose Problem Is It?, 4-5
Computer Strategy Planning, 12-5
A Computer To Help Salesmen Sell, 1-25
Computer Vision Techniques For Industrial Applications and Robot Control, 4-20
Computers and Data Processing—3rd Edition, 11-33
Computers—Fall 1982 Survey Update, 4-14
Concurrency, 12-23
Connecting Micros To Mainframes, 6-14
Considering Network Management Software, 7-21
A Contested Technology From Abroad, 2-12
Contingency and Disaster Planning In the EDP Area, 1-7
Contracting for Computer Products, 6-4
Controlling Complex Networks, 12-19
Controlling the Data Exchange, 6-15
Controlling Micros and Distributed Data Processing: Using the Central Support Group Approach, 3-8
Controls Prevent Computer Negligence and Fraud, 7-31
Conversing With Computers, 7-22
The Corporate Communications Conundrum, 10-13
Corporate Micro Software: The New Breed, 7-14
Corvus Concept Personal Workstation, 1-14
Creating and Using a DP Budget For Management Control, 3-11
The Criteria and the Charm Of the Master Patient Index, 2-17
Crossing the Lines With Voice Mail, 12-20
CRTs and Eye Health Are Studied, 6-10
Curing Micro-Phobia, 3-17
A Custody Agreement For a Computer Source Code, 8-11

Data Acquisition Systems: The Microprocessor Revolution, 10-25
Data Encryption: A Pending Necessity, 4-27
Data Processing: A Management Paradox (Software Maintenance Predicament—Part I), 7-5
The Data Processing Manager's Survival Manual—A Guide For Managing People and Resources, 5-31
Data Recovery Expert Helps Users Save Cash After "Crashes", 3-3
Database Machines—What and Why, 2-15
Database Management Systems: An Operational Perspective, 6-16
Database Software Packages For Micros, 1-14
Decision Support Systems For Minis and Micros, 5-19
Dedicated Word Processors Vs. Packaged Software? For Once You Can Hardly Go Wrong, 12-11
Deducting Your Personal Computer From Your Taxes, 1-26
Design Strategy For Nonprocedural Languages, 8-9
Develop Vs. Buy Decisions On DP Software, 6-7
Developing a Disaster Recovery Plan, 6-8
Developing a Patient Database On a Microcomputer, 9-15
Development Methodologies For Scientific Software, 5-26
Development Of a Programming Productivity Measurement System, 10-8
DG Expands MV Line with Low-end CPU, 4-17
Dialog: The Ultimate On-line Library, 10-23
Digital Signatures: A Tutorial Survey, 7-31
Direct Manipulation: A Step Beyond Programming Languages, 12-26
Directory Of Computers For the Law Office: A Survey Of Some Available Management/Financial Systems, 11-14
Disaster Prevention, 5-16
Disaster Recovery Planning, 9-5
Disk Market Overview, 2-8
Disks/Diskettes, 2-8
Disorder To Discipline Via the Data Dictionary, 7-8
Distributed Processing With Microcomputers, 4-8
Do I Need To Limit Access Anymore?, 5-14
Document Analysis System, 4-25
Document Your Flexibility In Third Party "Flexible" Leases, 2-22
The Documentation Hassle, 4-10
Doing It Right: A Microcomputer Implementation Strategy, 8-6
DOS To MVS: Not Just a Technical Change, 3-3
DP Professionals Assume a Key Role In Info Management, 12-3
A Dynamic Approach To Distribution, 10-24

Ease Of Use—What Does It Mean?, 1-3
The Economic Leverage Of Commercial Software, 8-12
EDP Auditing and Off-Site Storage, 9-17
Effective Information System Security With Password Controls, 8-21
EFTS Impact On Computer Security, 8-22
8-Bit Vs. 16-Bit: Does It Make Any Difference?, 4-19
Eight General Ledgers For Small Businesses, 6-25
The 801 Minicomputer, 10-29
802: A Progress Report, 11-31
The "Electrocution" Of Print, 9-21
Electronic Document Delivery: The ARTEMIS Concept For Document Digitalisation and Teletransmission, 1-28
Electronic Document Management, 6-33
Electronic Fund Transfer Systems and Risk Management, 3-10
Electronic Funds Transfer: Why the Benefits Outweigh the Costs, 10-25
The Electronic Library: Impact On Professionals, 10-5
Electronic Mail: Exciting Approach To Business, 1-3
Electronic Publishing, the New Newsletter, 7-29
End User Programming DP and End User Perspectives, 5-9
Ethernet Integrates Worldwide Design Firm Activities, 12-29
Evaluating Band Printers, 2-7
Evaluations—Apple IIe, Texas Instruments Professional Computer, Wang Professional Computer, 10-22
Executing Large Graphics Programs With a Small Computer, 2-25
The Executive's Guide To Data Base Management Systems, 5-5
Experiences With Tele-Commuting, 3-16
Expert Computer Systems, 6-32
Expert Users Will Change the DPMA Role, 12-4
Exploring the Capabilities Of Local Area Networks, 7-19

A False Sense Of Security, 11-21
Fast Basic Beyond TRS-80 Basic, 1-29
Fault Tolerant Systems: Constant As the Sun, 6-16
FedLine: The Bankers' Bank Installs the PC, 3-19
50 Ways To Hide a Personal Computer, 7-34
Financing Alternatives For Hardware and Software, 2-21
Fitting PCs Into Your OA Plan, 11-24
For a National Information Committee, 1-23
Fortune—A 16-Bit Micro With Style, 2-5
4GLs Provide End Users a Wide Range of DP Capabilities, 8-13
Fundamentals Of Computers & Data Processing with BASIC, 9-28
Future Challenges For Computer Operators, 8-24
Generators Multiply Output, 5-20
Generic Operating Systems, Bringing the Pieces Together In Office Systems, 2-4
Getting the Best From Data Banks, 7-19

Getting Smart: Public Data Bases, 11-28
Getting Too Much System—An Avoidable Tragedy, 12-33
Getting the Word Around, 7-33
Gigantic Printer Directory, 2-10
Graphics Protocol, 6-32
The Graphics Side Of Group Technology, 9-14
The Graphsheet Contenders, 6-26
The GSA Computer Store: Forcing Innovative Federal Procurement?, 11-24
A Guide To Patenting Software, 5-27

Hand-Held Computers, 2-6
The Hard Facts About Color Graphics, 6-17
A Hard Stand For Software Protection, 11-10
The History Of Myth No.1, 7-11
The Hottest Idea Around—Programs That Write Programs For You, 12-21
How a Computer Should Talk To People, 4-24
How Computing Aided the Restoration of Borobudur, 3-20
How a Properly Structured Career Plan Can Attract and Keep the Real Pros, 2-23
How Sweet It Is: DBMS, 6-15
How To Avoid the Negative Effects Of EDP Audits and Increase the Chance Of Audit Recommendations Implementation, 7-3
How To Buy Computer Supplies, 3-5
How To Choose a Local Network, 2-11
How To Define and Plan a System For Integrated Closed Loop Manufacturing Control, 11-8
How To Fight Computer Fraud, 10-18
How To Improve Computer Advisory Services, 1-17
How To Keep Automated Equipment Up and Running, 8-13
How To Launch the Information Centre, 12-29
How To Maintain Long Life and Quality Of Diskettes, 1-10
How To Make CAD/CAM Work For You, 12-27
How To Manage the DP Department Effectively, 3-4
How To Manage Your Small Computer, 6-36
The How-to Of Managing Micros In Your Firm, 10-2
How To Pick a Winner: A Look At Software Methodologies, 7-9
How To Rank Computer Projects, 5-6
How To Select a Video Terminal, 2-9
How To Select Your Small Computer, 6-36
How To Successfully Resist a Computer System and Avoid Its Benefits: A Victory For the Bureaucracy?, 10-7
How Work Will Change: User Experiences, 8-26
How Work Will Change: Research, 8-26

REFERENCES

The staff of Data Processing Digest regularly monitors an average of 150 computer, trade, educational, scientific, and business management periodicals for appropriate articles to digest each month. The list of periodicals varies widely from year to year, and even from month to month, as new periodicals appear, and old ones die out or change their editorial direction. Every June issue and the year-end annual supplement include all the publishers' addresses for your convenience. During other months of the year, only the periodicals referenced in that issue are given. All addresses which do not include a country are in the U.S.

Please request copies of originals from the publisher of the periodical. Do not write to *Data Processing Digest*, as we do not copy or reprint, and your request will be delayed. Books should be ordered from their publishers or from a local technical book store.
